WORK EXPERIENCE

Specialist Programmer

Infosys 🗷

04/2021 - Present

Bangalore, India

Roles/Responsibilities

- Currently working as a Full Stack Developer for Eli Lilly, USA. Reduced the
 incoming bug inflow in one of their application from 150+ to 8 in a span of 3
 sprints thus reducing the defect inflow by 95%. Also developed lots of
 important modules from scratch like a robust role based access system,
 stringent error handling and monitoring.
- Worked as a Full Stack Developer for British Petroleum(BP), UK for which
 I developed and globally scaled the frontend(React) along with a few
 microservices of an application which is being used in multiple countries
 across Europe to change the way marketing promotions are served.
- Worked as a Full Stack Developer (JavaScript) for Apple, USA. Developed fully functional and 100% pixel perfect, responsive screens for a project and also added new functionalities to existing ones. Have also worked on projects with companies like Mckesson, Toyota, Sweden and Broadcom previously.

System Engineer Specialist Infosys

05/2019 - 03/2021

Bangalore, India

Roles/Responsibilities

- Worked on a total of 2 projects with clients like Broadcom and Toyota Sweden in a span of around 1.5 years.
- Got good exposure of the ELK stack and made a custom Angular Dashboard with a SpringBoot Backend to show advanced metrics and visualizations of the whole infrastructure.
- Did quite a lot of scripting work in Python/PowerShell/Unix to automate things in the workflow. Highlight was a project that auto installed updates to all the Routers in Europe for Toyota saving around 90% of manual labor and time.

Freelance Android Engineer

Rivi 🗷

10/2018 - 05/2019

Bangalore, India

Rivi is an AI assistant app that helps you plan and book the most economical and efficient Flight Tickets.

Roles/Responsibilities

- Wrote backend API integration code along with the frontend screen development for the Rivi android app.
- Integrated a complex web socket chat mechanism in the app which forms the crucial USP of the product.
- The App is currently available at the Google Playstore and has around 10k downloads.

EDUCATION

Bachelor of Technology - BTech, CSE

SRMIST, Chennai

2015 - 2019

Grade: First Class with Distinction

TECHNICAL SKILLS

PERSONAL PROJECTS

Fureka Al 🕜

 Built a Gen AI app using Gemini which can teach you any topic in the style of your favourite celebrity.

Canthari 🗹

 Developed a simple E-Commerce site for a luxury shoe seller in Chennai. The Wordpress CMS engine was used for the development.

SRMITE (Deprecated)

 Created an Android app called SRMite which helped the student of SRM to track their attendance and browse through all things related to their college ranging from marks to their time-table. It was on the Google Play Store with 20,000 lifetime users at the time of it's peak.

ACHIEVEMENTS
